## **NEW SEARCH SERVICE**

ASPIRAS undertakes searches on the pharmaceutical market development and special indication segments, forms of therapy and latest trends, compiles company profiles and a good deal more for you . . .

Try out our new individual service; you can get more information under [paul@aspiras.de](mailto:paul@aspiras.de).

## **PARTNER WANTED FOR A DOUBLE-CHAMBER SYRINGE**

We are supporting a creative inventor in his sought after partners for his innovative double-chamber syringe which is particularly suitable for the application of biotechnologically produced drugs. The syringe as a closed system avoids contamination during preparation of the injection and also saves the doctors time and therefore costs.

More examples of projects as well as Letters of Excellence we obtained from satisfied clients after successful project implementation you will find under <http://www.aspiras.com/en/seiten/projektbeispiele.html>.

## **PARTICIPATION IN FAIRS IN AUTUMN 2007**

To keep our know-how up to date and to keep in touch with our clients and business partners we will be present at the following events in the near future:

**BIOTECHNICA**, 9. – 11. Oktober 2007 in Hannover

The BIOTECHNICA is the most important european fair of biotechnology. It is a meeting place for experts on industry, science and politics.

**Deutsche BiotechnologieTage**, 8. – 9. Oktober 2007 in Hannover

It is the subsequent event of the „BMBF-BiotechnologieTage“ and is a central information and communication platform for experts out of all fields of application. The “Deutsche BiotechnologieTage” are annually held in parallel to the BIOTECHNICA.

**PharmaForum 2007**, 5. November 2007 in Mainz

The „PharmaForum“ exists since 2003. It is a communication platform for the facilitation of collaborations in this line of business. Cooperation is a strategic factor in this sector. Mutual projects between active pharmaceutical groups, young companies and start-ups close to science are a benefit for both sides.

The main focus this year is „fair competition as a location factor“.

## **BIOPHARMA – THE STRATEGY COMPETITION FOR OUR FUTURE MEDICINE**

The Federal Ministry of Education and Research intends to optimise the route of a new drug from the laboratory to the pharmacy by its pharma-initiative for Germany. Strategic concepts on the efficient formation of the biopharmaceutical value-added chain will be funded. Commercialisation of biotechnological therapies in Germany will be sponsored with 100 million Euro for a period of five years.

ASPIRAS will take active part in this competition. If you and your company also wish to participate as part of a biopharmaceutical value-added chain we would be glad to support you in the development of concepts.
